Bilateral Meetings

- Thursday 13:00 - 16:30

Description

PureAqua's main profile is water and wastewater treatment. We have an extensive knowledge in treating different kinds of industrial wastewater (coking, automotive, leather, food, beverages etc.). Besides constructing and operating such systems, we also design and manufacture equipment used in wastewater treatment, so beside the manufacturing equipment and technology R&D plays crucial role in our everyday activities. Some of the results of our recent projects coming to fruition: pilot scale high salinity wastewater evapo-treatment plant, high metal content wastewater vacuum evaporator, patented SBR wastewater treatment control system.
