

Ivica Nenčić

Managing director

3ES doo

Bilateral Meetings

- Thursday 13:00 - 16:30

Description

3ES offers you a wide spectrum of services in consultancy (owner's engineer), project development and design, management and construction in the electrical and industrial automation domains. We apply leading-edge technical and technological solutions and software tools to develop optimum solutions in the fields of electrical power (generation, transmission and distribution, consumers), renewable energy sources, water and wastewater treatment, industrial plants and residential-commercial structures. Our engineering team supports the client along each step from project initiation and conceptualization through to commissioning.
